

# SWIS DIP/Online Enhancements: August 2016

In August 2016 CalRecycle released an updated version of the SWIS DIP/Online site used by Local Enforcement Agencies (LEAs) to enter and submit inspections to CalRecycle. The bulk of the update involved upgrades to behind the scenes technical aspects of the site to improve speed and stability. However, the update did include cosmetic and minor functionality updates to the web forms used by LEAs.

## Cosmetic Refresh of Web Pages

The update includes a refresh to the web site, adding a slightly different color scheme, rounded corners to most boxes, and minor enhancements to allow the pages to work better on smaller screen sizes. Certain pop-up dialogs also were improved to reflect modern web browser standards.

## Simplified Left Navigation

**Left Navigation now always shows Add and Search Inspections links.**

**Formerly, these links were buried one level down.**

## Minor Modification for Adding Attachments

Around 18% of inspections added by LEAs include attachments. To avoid occasional problems during the attachment uploads, the process for adding inspection attachments has been slightly modified. When initially adding an inspection, the data portion of the inspection must be entered and **saved before an attachment(s) can be added**--the attachment portion of the form will be unavailable until an inspection has been initially saved. To assist with this, a new "Save and Add Attachment" button has been added to the bottom of the Add Web Form Inspection screen that saves inspection record and then jumps you to the attachment part of the screen.

After selecting the "Save and Add Attachment" button, the inspection is saved and your web browser will jump to the lower portion of the form where the "Inspection Attachment" part of the form is now available.

**Inspection Attachments**

\* 1. Enter Title: (shown to Public)  \* 2. Upload File:  No file chosen 3. Save Attachment

TITLE

The Attachment portion of the form has also been slightly modified to make more clear the three steps required to successfully upload an attachment.

New				Previous			
Inspection Attachments				Upload Attachments			
* 1. Enter Title: (shown to Public)	* 2. Upload File:	3. Save Attachment		Attachment Title	File Name	Content Type	
<input type="text" value="Descriptive title--at least 6 characters long"/>	<input type="button" value="Choose File"/> No file chosen	<input type="button" value="Save"/>		<input type="text"/>	<input type="button" value="Browse..."/>	<input type="text"/>	<input type="button" value="Add"/>
